1010-7:10-101. Control.

(a) The use of poisonous compounds to control weeds, rodents, insects, and other pests shall be implemented only after other means have been used for control, such as the elimination of harborages, cleaning food waste, and sealing of ports of entry. These compounds shall be used according to labeled instructions.

(b) All food, food utensils, and equipment, bedding, toys, sleeping mats and other equipment, materials and items that will come into contact with food or children shall be protected during the time pesticide application is conducted. Pesticides shall be applied in a manner as to prevent skin contact and other exposure to children or staff. Application of pesticides shall not be conducted when children are present.

(c) Only approved, U.S. Environmental Protection Agency registered insecticides, rodenticides, and herbicides may be used. Application must strictly follow all label instructions and must be authorized by the director. Rodenticides shall be dispensed in tamper proof boxes, shall have a distinctive color so as not to be mistaken for food, and shall be in cake or pellet form.

(d) Restricted pesticides shall be applied only by a certified pest control applicator or under the direct supervision of a certified pest control applicator.

1010-7:10-206. Asbestos.

Before the start of any renovation or demolition, the components of the child care facility to be affected by the renovation or demolition shall be inspected by a State certified asbestos inspector to determine if abatement is required. If asbestos is found, it shall be managed in accordance with the Colorado Air Quality Control Commission Regulation Number 8 Part B.

Buildings, or those portions thereof, that were constructed after October 12, 1988, shall be exempt from this inspection requirement if an architect or project engineer responsible for the construction of the building, or a State certified inspector, signs a statement that no asbestos containing material was specified as a building material in any construction document for the building or no asbestos containing material was used as a building material in the building. The Air Pollution Control Division recommends that all buildings be inspected prior to any renovation or demolition activities, regardless of the date of construction.
